PROFESSIONAL SUMMARY

Information Science and Engineering graduate (B.E., 2026) with hands-on project experience in data analytics, Python backend development, and full-stack web development. Completed a training-based Data Analytics internship and built projects spanning AI-assisted analytics, MySQL-based customer behavior analysis, and IoT health and location monitoring. Experienced with Python, MySQL/SQL, Pandas, React, FastAPI, REST APIs, database integration, and AI-assisted development. Seeking entry-level opportunities in data analytics and software development.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), C, Java

Databases & Querying: MySQL, SQL, PostgreSQL, MongoDB, Supabase

Frontend Development: HTML5, CSS3, React.js, Next.js, Vite

Backend Development & APIs: FastAPI, Node.js, RESTful APIs, Google Sheets API, API integration

Data Analytics & Visualization: Pandas, NumPy, Matplotlib, Power BI, Microsoft Excel, Jupyter Notebook

AI-Assisted Development: AI-assisted coding and application development, code generation, debugging, and iterative problem-solving; API integration

Tools & Platforms: Git, GitHub, VS Code, MySQL Workbench, Vercel, Render, Netlify

Technical Concepts: Object-Oriented Programming (OOP), CRUD operations, REST APIs, authentication and authorization, JWT verification, SDLC, operating system fundamentals, version control

EXPERIENCE

Data Analytics Intern — Skyllx Technologies Pvt. Ltd.
Bengaluru, India | January 2026 – May 2026 | Training-based internship

- Completed mentor-guided training and independently practiced and implemented two project-based analytics applications.
- Applied Python, Pandas, Jupyter Notebook, and MySQL to clean, explore, and query customer shopping behavior data.
- Built an interactive Power BI dashboard to examine revenue, product categories, customer segments, subscription trends, age groups, and ratings.
- Developed DataSnap, a full-stack analytics workspace integrating React, FastAPI, Supabase PostgreSQL, and AI-assisted features.

PROJECTS

Real-Time Soldier Health & Position Tracking System

Final-Year Team Project | React.js, JavaScript, Google Sheets API, ESP32, health sensors, GPS

- Developed a dashboard to monitor heart rate, body temperature, oxygen saturation, and GPS location collected by an ESP32-based wearable device.
- Integrated sensor and location data through Google Sheets with automatic polling for near-real-time dashboard updates.
- Implemented Normal, Warning, and Critical status classifications with software alerts for abnormal readings.
- Added dashboard visualizations and data-export functionality for reviewing recorded readings.
- Selected for the KSCST 49th Annual State-Level Student Project Programme poster presentation and exhibition.

GitHub Repository

DataSnap — AI-Powered Analytics Workspace

Internship Project | React 18, JavaScript, Vite, FastAPI, Supabase PostgreSQL, Supabase Auth

- Developed a full-stack analytics workspace using React 18 and FastAPI, with Supabase PostgreSQL for database functionality.
- Implemented dashboard CRUD operations, drag-and-drop layouts, and five chart types: bar, line, area, pie, and scatter.
- Integrated APIs to support AI-assisted insights and natural-language data queries.
- Implemented backend JWT verification using Supabase authentication and JWKS, and worked across frontend/backend integration and debugging.
- Deployed the frontend on Vercel and backend on Render.

Live Demo | GitHub Repository

Customer Shopping Behavior Analysis Dashboard

Internship Project | Python, Pandas, MySQL, MySQL Workbench, Power BI, Jupyter Notebook

- Performed data cleaning and exploratory analysis of customer shopping behavior using Python and Pandas in Jupyter Notebook.
- Wrote MySQL queries to examine customer segments, revenue, product categories, and subscription status.
- Built an interactive Power BI dashboard covering customer segmentation, revenue, product categories, subscription trends, age groups, and review ratings.
- Identified findings including clothing as the leading revenue category, non-subscribers accounting for the majority of purchases, and an average review rating of 3.75.

EDUCATION

R R Institute of Technology, Bengaluru – 2022 – 2026
Bachelor of Engineering in Information Science and Engineering | CGPA: 7.78/10

Y.T.S.S PU College, Yellapur – 2020 – 2022
Pre-University Course | Percentage: 70.83%

CERTIFICATIONS & ACHIEVEMENTS

Achievement

- Selected for the Karnataka State Council for Science and Technology (KSCST) 49th Annual State-Level Student Project Programme poster presentation and exhibition, 17–18 July 2026, BGSIT, Mandya, for the Real-Time Soldier Health & Position Tracking System.

Certifications

- Java Programming – Udemy
- Python for Everybody – Udemy
- Database Management with MySQL – Infosys Springboard
- Web Development Fundamentals – IBM SkillsBuild
- JavaScript Essentials 1 & 2 – Cisco Skills for All
- AI for Students workshop
